# Port Waste Management Plan

January 2023

# Port Waste Management Plan – Chichester Harbour

## Legislation

The Merchant Shipping and Fishing Vessels (Port Waste Reception Facilities) Regulations 2003 (SI:2003/1809) transpose the EU Directive 2019/83/EC of the European Parliament and Council on port reception facilities for ship generated waste and cargo residue. These regulations, in the case of Chichester Harbour, place a requirement on all mooring providers from whose facilities yachts may go to sea for more than a day and so are likely to generate waste, and which charge a mooring or berthing fee, to submit a plan.

There are 7 Marinas, 6 sailing clubs and 8 commercial multiple mooring sites within Chichester Harbour that fall into this category. This plan integrates the waste management planning requirements of all these facilities into a single document. In developing this plan further guidance was obtained from MGN 563, and from Port Waste Management Planning – A Guide To Good Practice (Annex E, MGN 563).

Responsibility for the implementation of the Chichester Port Waste Management Plan rests with:

Ed Carter—Senior Deputy Harbour Master

[ed.carter@conservancy.co.uk](mailto:ed.carter@conservancy.co.uk)

01243 510980

## Consultation

All harbour users have an obligation to land waste for disposal, rather than dump it at sea; their needs and priorities differ though and in order to provide the right facilities there must be a constructive dialogue between waste facility providers and the waste producers.

As Harbour Authority Chichester Harbour Conservancy keeps records of all vessels based in Chichester Harbour. This provides a valuable opportunity for the Conservancy, through its annual publication Harbour News, which is given free to all harbour users, to inform and educate with regard to both waste reception facilities and waste disposal obligations; and to seek producers' views on types and siting of waste reception facilities.

### Action:

1. Chichester Harbour Conservancy will consult Waste Facility Providers annually to update our Waste Management Plan. Port waste management issues will be discussed at 6-monthly marina manager meetings.
  - a) Meeting held on 04 December 2020. Marina managers were shown new and reformatted PWMP and comments were invited. All managers happy with the plan, minor amendments to bin numbers and reported disposed waste volumes were received.
2. The annual Information for Mariners booklet and the Conservancy's website: [www.conservancy.co.uk](http://www.conservancy.co.uk) contain waste management information and canvasses the views of waste producers.
3. Harbour users will be advised by e-newsletter during the life of each plan that the Port Waste Management Plan can be viewed on our website and feedback will be invited.

## Analysing the need

The approach taken in this plan concentrates on adequate provision of reception facilities through survey and general assessment. Numbers of resident and visiting vessels in Chichester Harbour are very stable, indeed for many years there has been a moratorium on new moorings and required capacity has been successfully refined over the years.

With shoal depth at the entrance and within Chichester Harbour, and berthing facilities geared exclusively for small leisure vessels it is not anticipated that the harbour will receive visits from ships requiring to pre-notify of waste on board. We are cognisant though of our obligation to receive such notification and cater for such waste in the unlikely event of a visit from a qualifying vessel. A notification form is detailed at Annex A for ships or recreational vessels carrying more than 12 passengers.

**Action:**

1. A register of reception facilities will be kept at the Harbour Office for each landing area.
2. Periodic checks, at random, will be made by Harbour Patrol staff to ensure that the facilities and clearing regime are adequate.
3. Waste producers are invited to inform us when they identify a shortfall in provision. (See consultation)

**Considering the type and capacity of waste reception facilities**

The waste landed within Chichester Harbour from recreational vessels is generally similar to that of mixed household waste. In addition reception facilities are required for waste oil, batteries and to receive effluent from holding tanks.

MGN 563 Port Waste Management encourages greater recycling of ship landed waste and since 30 October 2007 the Landfill Directive has required trade waste to be treated before disposal.

Chichester Harbour Conservancy sponsored a successful bid to the AONB Sustainable Development Fund to part fund audits and rollout recycling facilities at the premises covered by this plan. Most mooring providers now provide a comprehensive range of recycling streams.

**Action:**

1. Discussions with waste reception providers will seek to increase the level of recycling.
2. As recycling facilities come on stream the Port Waste Management Plan will be updated.

**Reporting Inadequacies**

MGN 563 (Annex D) Consolidated Reporting Form for Alleged Inadequacies of Port Reception Facilities – revised, outlines the procedure for reporting inadequacies. In Chichester Harbour the following protocol is advised:

1. In the first instance a report should be made to the facility provider and copied to Chichester Harbour Conservancy.
2. If the report is not dealt with in a timely and adequate manner a complaint should be made to Chichester Harbour Conservancy and an investigation will be carried out.
3. If the matter cannot be satisfactorily resolved the Conservancy, or in the case that the complainant is unsatisfied with the Conservancy's findings, the complainant, will submit a formal report to the MCA. The MCA's form for reporting inadequacies is appended at Annex B. Completed forms can be sent to:

PWR Inadequacies  
Environmental Policy Branch  
Maritime and Coastguard Agency  
Spring Place, 105 Commercial Road  
Southampton, SO15 1EG

## **Disposal of Prescribed Waste**

All waste facility providers need to ensure that collected waste is properly disposed of. The Environment Agency licenses waste collectors, and the Conservancy will verify that each waste facility provider is using appropriately licensed contractors, as registered with the Environment Agency.

## **Highly Hazardous Waste**

Ship produced food waste from outside of the UK or EU is classed as category one waste (highly hazardous waste) under the Animal By-Products Regulation EC/1774/2002. Although it is highly unusual to receive this type of waste in Chichester Harbour facilities exist in Chichester Marina, Birdham Pool and Northney Marina to receive it.

## **Sewage**

Three sewage pump-out facilities currently exist within Chichester Harbour; at the Harbour Office, Itchenor, Premier Marina, Chichester, and Emsworth Yacht Harbour.

## **Incorrect Disposal of Waste from Private Vessels**

Where private vessels are identified to have disposed of waste directly into the harbour, in the first instance a warning can be given, along with instruction to clear any improperly disposed waste as appropriate. Byelaw 27 (Rubbish and Refuse) can be used to potentially prosecute offenders which can carry a fine not exceeding level 3 on the standard scale. Enforcement action can also be taken under MARPOL 73/78 (Annex IV: Pollution by Sewage from Ships and Annex V: Pollution by Garbage from Ships).

## **Cost of Facilities**

The Conservancy believes that, within a recreational harbour waste reception should be 'free at the point of disposal' and that the costs of provision of facilities should be contained within other Harbour dues and berthing charges. Chichester Harbour Conservancy reserves the right to re-charge fees where the volume or nature of the waste is considered exceptional and CHC incur additional charges for its disposal.

### **Action:**

1. To provide waste reception facilities at all relevant locations within Chichester Harbour free at the point of disposal funded, where relevant, from within Harbour Dues or mooring charges.

## **Review**

The Conservancy is committed to maintaining the highest environmental standards of waste reception. A report will be prepared for presentation to the MCA following each review.

### **Action**

1. The effectiveness of the plan will be kept under continuous review, particularly in the light of any complaints or significant operational changes.
2. There will be a formal reassessment of the plan every three years which is due in 2024. The document is the submission for 2021 – 2024. As a living document, it will be formally reviewed annually and any material changes added as they occur.

## The Report

The following report lists the location, type, and capacity of all port waste reception facilities within Chichester Harbour. Maps of each location are also included. *Please note that the map symbols do not indicate the number of disposal facilities available, but rather reflect the site location where each facility can be found.*

## INFORMATION TO BE NOTIFIED

---

### INFORMATION TO BE NOTIFIED BEFORE ENTRY INTO THE PORT OF

## CHICHESTER HARBOUR

*(The harbour, terminal or port referred to in regulation 11 of the Merchant Shipping and Fishing Vessels (Port Waste Reception Facilities) Regulations 2003 and Article 6 of Directive 2000/59/EC).*

1. Name, call sign and, where appropriate, IMO identification number of the ship:
2. Flag State:
3. Estimated time of arrival (ETA):
4. Estimated time of departure (ETD):
5. Previous port/terminal:
6. Next port/terminal:
7. Last port/terminal and date when ship-generated waste was delivered:
8. Are you delivering  
all  some  none  of your waste into Port Reception Facilities?  
*(tick appropriate box)*

9. Type and amount of waste and residues to be delivered and/or remaining on board, and percentage of maximum storage capacity:

*If delivering all waste, complete second column as appropriate.*

*If delivering some or no waste, complete all columns.*

Type (* may be estimates)	Waste to be Delivered (m <sup>3</sup> )	Maximum dedicated storage capacity (m <sup>3</sup> )	Amount of waste retained on board (m <sup>3</sup> )	Port/Terminal at which remaining waste will be delivered	Estimated amount of waste to be generated between notification and next port of call (m <sup>3</sup> )
<b>1. Waste Oils</b>					
Sludge					
Bilge Water					
Others (please specify)					
<b>2. Garbage</b>					
Food waste					
Plastic					
Other (please specify)					
<b>3. Cargo-associated waste* (specify)</b>					
<b>4. Cargo residues* (specify)</b>					

*Notes:*

1. This information may be used for Port State Control and other inspection purposes.
2. Member States will determine which bodies will receive copies of this notification.
3. This form is to be completed unless the ship is covered by an exemption in accordance with Article 9 of Directive 2000/59/EC.

**I confirm that the above details are accurate and correct and that there is sufficient dedicated onboard capacity to store all waste generated between notification and the next port/terminal at which waste will be delivered.**

## REVISED CONSOLIDATED FORMAT FOR REPORTING ALLEGED INADEQUACIES OF PORT RECEPTION FACILITIES

The Master of a ship having encountered difficulties in discharging waste to reception facilities should forward the information below, together with any supporting documentation, to the administration of the flag State and, if possible, to the competent Authorities in the port State. The flag State shall notify the IMO and the port State of the occurrence. The port State should consider the report and respond appropriately informing IMO and the reporting flag State of the outcome of its investigation.<sup>1</sup>

### 1. SHIP'S PARTICULARS

1.1 Name of ship:

1.2 Owner or operator:

1.3 Distinctive number or letters:

1.4 IMO Number: <sup>2</sup>

1.5 Gross tonnage:

1.6 Port of registry:

1.7 Flag State: <sup>3</sup>

1.8 Type of ship:

Oil tanker

Chemical tanker

Bulk carrier

Other cargo ship

Passenger ship

Other (specify)

### 2. PORT PARTICULARS

2.1 Country:

2.2 Name of port or area:

2.3 Location/terminal name:

(e.g. berth/terminal/jetty)

2.4 Name of company operating

the reception facility (if applicable):

2.5 Type of port operation:

Unloading port

Loading port

Shipyards

Other (specify)

2.6 Date of arrival: / / (dd/mm/yyyy)

2.7 Date of occurrence: / / (dd/mm/yyyy)

2.8 Date of departure: / / (dd/mm/yyyy)

1. This format was approved by the fifty-third session of the Marine Environment Protection Committee in July 2005.

2. In accordance with the IMO ship identification number scheme adopted by the Organization by Assembly resolution A.600(15).

3. The name of the State whose flag the ship is entitled to fly.

### 3. INADEQUACY OF FACILITIES

3.1 Type and amount of waste for which the port reception facility was inadequate and nature of problems encountered.

Indicate the problems encountered by using one or more of the following code letters, as appropriate:

A: No facility available

B: Undue delay

C: Use of facility technically not possible

D: Inconvenient location

E: Vessel had to shift berth involving delay/cost

F: Unreasonable charges for use of facilities

G: Other (please specify in paragraph 3.2)

Type of waste	Amount for Discharge (m <sup>3</sup> )	Amount not accepted (m <sup>3</sup> )	Problems Encountered
<b>MARPOL Annex I related</b>			
<i>Type of oily waste:</i>			
Oily bilge water			
Oily residues (sludge)			
Oily tank washings (slops)			
Dirty ballast water			
Scale and sludge from tank cleaning			
Other (please specify)			
<b>MARPOL Annex II related</b>			
<i>Type of NLS<sup>4</sup> residue/water mixture for discharge to facility from tank washings:</i>			
Category A Substance			
Category B Substance			
Category C Substance			
Category D Substance			
<b>MARPOL Annex IV related</b>			
Sewage			

<b>MARPOL Annex V related</b>			
<i>Type of garbage:</i>			
Plastic			
Floating dunnage, lining or packing materials			
Ground paper products, rags, glass, metal, bottles, crockery etc			
Cargo residues, paper products, rags, glass, metal, bottles, crockery etc			
Food waste			
Incinerator, ash			
Other (please specify)			
<b>MARPOL Annex VI related</b>			
Ozone depleting substances and equipment			
Exhaust gas-cleaning residues			

4. Indicate, in paragraph 3.2, the proper shipping name of the NLS involved and whether the substance is designated as 'solidifying' or 'high viscosity'.

3.2 Additional information with regard to the problems identified in the above table.

3.3 Did you discuss these problems or report them to the port reception facility?

Yes                      No

If Yes, with whom (please specify)

If Yes, what was the response of the port reception facility to your concerns?

3.4 Did you give prior notification (in accordance with relevant port requirements) about the vessel's requirements for reception facilities?

Yes              No              Not applicable

If Yes, did you receive confirmation on the availability of reception facilities on arrival?

Yes              No

#### 4. ADDITIONAL REMARKS/COMMENTS
